Re: Water Conservation in times of drought and extreme heat.

Dear customers of The Florissant Water & Sanitation District

Due to the decrease of water in our supply from Twin Creek and extreme heat, we will have to curtail all outdoor watering along with the washing of vehicles in driveways until further notice. Please conserve in other activities that require large amounts of water such as washing clothes one load per day. This is in accordance with article 3-4 water conservation of the FWSD Rules and Regulations. This ban will have to remain in effect until we start receiving more rain. Currently, we can walk across Twin Creek only leaving a small foot print and our shoes remain dry. We have already cut off water sales to those outside the district. The next step will be to purchase water from the City of Colorado Springs if an agreement can be reached.

A copy of the FWSD Rules and Regulation book can be seen on our website :
